Instructie Stale DCA en DCA Pulse Printfleet verhelpen

Auteur:
PCI Nederland

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 in the USA (U.S. Census Bureau 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The World Health Organization (WHO) has developed a 'Global Strategy on Ageing and Health' (WHO 1999) and the United Nations has developed a 'World Report on Ageing and Health' (United Nations 2002). The WHO strategy focuses on the need to develop strategies to meet the needs of the ageing population, and the United Nations report focuses on the need to develop strategies to meet the needs of the ageing population.

The WHO strategy focuses on the need to develop strategies to meet the needs of the ageing population, and the United Nations report focuses on the need to develop strategies to meet the needs of the ageing population. The WHO strategy focuses on the need to develop strategies to meet the needs of the ageing population, and the United Nations report focuses on the need to develop strategies to meet the needs of the ageing population.

Inhoudsopgave:

1 Inhoudsopgave	3
1. Stale DCA status verhelpen voor DCA versie 4.x.xx voor windows	4
1.1. Controleer de status van de DCA tool	4
2. Stale DCA Pulse status verhelpen in Windows en MAC OS.	7
2.1. Controleer de status van de DCA tool	7

1. Stale DCA status verhelpen voor DCA versie 4.x.xx voor windows

Dit document kun je als handvat gebruiken wanneer PCI heeft geconstateerd dat er sinds enige tijd geen communicatie meer plaats vindt tussen de machine en Printfleet. Waarschijnlijk is de (DCA) niet langer actief. Dit betekent dat de tellerstanden niet automatisch worden doorgegeven. Een mogelijk oorzaak kan zijn dat er wijzigingen in het netwerk plaats hebben gevonden. Volg onderstaande instructies om de DCA tool opnieuw te activeren.

1.1. Controleer de status van de DCA tool

Open het start menu en voer een zoekfunctie uit voor de term “Printer DCA” of open het programma via C:\Program Files (x86)\Printer DCA.

Nadat de DCA tool is opgestart controleer je de server status:

Indien er geen 2 groene vinkjes zichtbaar zijn raden wij je aan om de IP-range te controleren. Ga hiervoor naar het tabje “scan” en voer de volgende stappen uit.
(Zie volgende pagina)

1. Controleer de IP-range.
2. Voer de juiste IP-range in als deze niet volledig is.
3. Bevestig de invoer met save rechts onderin het scherm.

(Zie volgende pagina)

Ga nu terug naar het tabje “status”.

Klik rechts onderin op “Force scan” en controleer de 2 groene vinkjes.

Je bent klaar met de controle.

Mocht je nog vragen hebben dan kun je altijd contact met onze service binnendienst opnemen op telefoonnummer 088-5430818.

2. Stale DCA Pulse status verhelpen in Windows en MAC OS.

Dit document kun je als handvat gebruiken wanneer PCI heeft geconstateerd dat er sinds enige tijd geen communicatie meer plaats vindt tussen de machine en Printfleet. Waarschijnlijk is de (DCA) niet langer actief. Dit betekent dat de tellerstanden niet automatisch worden doorgegeven. Een mogelijk oorzaak kan zijn dat er wijzigingen in het netwerk plaats hebben gevonden. Volg onderstaande instructies om de DCA tool opnieuw te activeren.

2.1. Controleer de status van de DCA tool

Start je internet browser op. (b.v. Chrome, Safari of Internet Explorer)

Type vervolgens onderstaande URL in de URL balk. <http://localhost:31816/>

Normaliter zal de onderstaande webpagina worden weergegeven.

Indien de onderstaande melding in het scherm verschijnt, kun je het beste de PC-MAC opnieuw opstarten.

Mocht het probleem zich na de herstart nog steeds voor doen neem dan even contact met ons op via dit email adres. printfleet@pcinederland.nl.
